Dr. J. COLLIS BROWNE'S CHLORODYNE

(Ex Army Med. Staff) IS THE ORIGINAL AND ONLY GENUINE.

CAUTION .- Vice-Chancellor Sir W. P. Wood stated that Dr. Collis Browne was undoubtedly the Inventor of Chlorodyne, that the story of the Defendant, Freeman, being the Inventor was deliberately untrue which he regretted had been sworn to. Eminent Hospital Physicians of London stated that Dr. J. Collis Browne was the discoverer of Chlorodyne; that they prescribe it largely, and mean no other than Dr. Browne's. See Times, July 12, 1864.

The public, therefore, are cautioned against using any other than DR. J. COLLIS BROWNE'S CHLORODYNE.

REMEDIAL USES AND ACTION.

This invaluable remedy produces quiet, refreshing sleep, relieves pain, calms the system, restores the deranged functions, and stimulates healthy action of the secretions of the body, without creating any of those unpleasant results attending the use of opium. Old and young may take it at all hours and times when requisite. Thousands of persons testify to its marvellous good effects and wonderful cures, while medical men extol its virtues most exten-

CHLORODYNE is admitted by the profession to be the most wonderful and valuable remedly ever discovered.

CHLORODYNE is the best remedyknown for coughs, consumption, bronchitis, asthma. CHLORODYNE effectually checks and arrests those too often fatal diseasesdiphtheria, fever, croup, ague.

CHLORODYNE acts like a charm in diarrhoes, and is the only specific in cholera and dysentery. CHLORODYNE effectually cuts short all

attacks of epilepsy, hysteria, palpitations aud spaams. CHLORODYNE is the only palliative in neuralgis, rheumatism, gout, cancer, tooth-

ache, meningitis, &c. FXTRICTS FROM MEDICAL OPINIONS. The Right Hon, Earl Russell communicated to the College of Physicians and J. T. Davenport that he had received information to the effect that the only remedy of

any service in Cholera was Chlorodyne.-See Lancet, Dec. 31, 1864. From A. Montgomery, Esq., late Inspector of Hospitals, Bombay :- "Chlorodyne is a most valuable remedy in Neuralgia, Asthma, and Dysentery. To it I fairly owe my restoration to health, after eighteen months' severe suffering, and when other

remedies had failed." Dr. Lowe, Medical Missionary in India, reports (December 1865) that in nearly every case of Cholera in which Dr. J. Collis BROWNE'S CHLORODYNE was administered, the patient recovered.

Extract from the General Board of Health, London, as to its efficacy in Cholera. -"So strongly are we convinced of the immense value of this remedy, that we cannot too forcibly urge the necessity of adopting it in all cases.

See leading article, Pharmacculical Journal, August 1, 1869, which states that Dr. J. Collis Browne was the inventor of Chlorodyne; that it is always right to use his preparation when Chlorodyne is ordered. CAUTION .- None genuine without the words "Dr. J. Coulis Brown?" on the Government Stamp. Overwhelming medical testimony accompanies each botfle.

THE CHINA REVIEW.

THE widely-expressed regret at the discontinuance of Notes & Queries on China and Japan, has induced the publishers of this journal to issue a publication similar in object and style, but slightly

modified in certain details. THE CHINA REVIEW, or Notes' and Queries on the Far East, is issued at intervals of two months, each number containing about 60 octavo pages, occasionally illustrated with lithographs, photographs, woodcuts, &c., should the papers published demand, and the circulation justify, such extra matter.

The subscription is fixed at \$6.50 postage paid, per annum, payable by non-residents in Hongkong half-yearly in advance.

The publication includes papers original and selected upon the Arts and Sciences, Ethnology, Folklore, Geography, History. Literature, Mythology, Manners and Cus, toms, Natural History, Religion, &c., &c., of China, Japan, Mongolia, Tibet, the Eastern Archipelego and the "Far East" generally. A more detailed list of subjects upon which contributions are especially invited is incorporated with each number, Original centributions in Chinese, Latine French, German, Spanish, Italian or Portuguese, are admissible. Endeavour. are made to present a resume in each number of the contents of the most recent works bearing on Chinese matters. Great attention is also paid to the Raview

Notes and Replies are classified together as "Notes" (head references being given, when furnished, to previous Notes or Queries), as are also those queries which, though asking for information, furnish new or unpublished details concerning the matter in band. It is desirable to make the Queries proper as brief and as much to the point as possible.

The China Review for July and August. 1875, is at hand. It says that forty-two essays were sent in to compete for the best paper on the advantages of Christianity for the development of a State. All our learn. ed societies should subscribe to this icholarly and enterprising Review. It is a sixty paged, bi-monthly, repertory of what scholars are ascertaining about China. The lecture on Chinese Poetry in this volume is alone worth the price of the Keview. Address China Review, Hongkong.-Northern Christian Advocate (U.S.)

Trubner's Oriental Record contains the following notice of the China Review :- "This is the title of a publication, the first number of which has lately reached us from Hongkong, where it has been set on foot as in some respects a continuation of Notes and Queries on China and Japan, the extinction of which useful serial a year or two ago has been much regretted in Europe as well as in China. The present publication, judging by the number now before us, is intended to occupy a position, as regards Chins and the neighbouring countries, somewhat similar to that which has been filled in India by the Calcutta Review. The great degree of attention that has been bestowed of late years upon the investigation of Chinese literature. antiquities, and social developments, to say nothing of linguistic studies, has led to the accumulation of important stores of inform. ation, rendering some such channel of publicity as is now provided extremely desirable; and contributions of much interest may fairly be looked for from the members of the foreign consular services, the Chinese Oustoms' corps, and the missionary body. among whom a high degree of Chinese scholarship is now assiduously cultivated. and who are severally represented in the first number of the Review by papers highly creditable to their respective authors. In a paper on Dr. Legge's She King, by the Rev. E. J. Eitel, to which the place of honour is deservedly given, an excellent summary is presented of the chronological, problems and arguments involved in connexion with this important work. Some translations from Chinese novels and plays are marked by both accuracy and freshness of style; and an account of the career of the Chinese poet-statesman of the eleventh century, Su Tung-p'o, by Mr. E. C. Bowra, is not only historically valuable, but is also distinguished by its literary grace. Beside notices of new books relating to China and the East, which will be a useful feature of the Review, if carried out with punctuality and detail, we are glad to notice that "Notes" and "Queries" are destined to find a place in its pages also. It is to be hoped that this opening for contributions on Chinese subjects may evoke a similar degree of literary zeal to that which was displayed during the lifetime of its predecessor in the field, and that the China Review may receive the support necessary to insure its continuance. The publication is intended to appear every two months, and will form a substantial octavo magazine,

THE CHINA MAIL.

HONGKONG, SATURDAY, MAY 10, 1879. THE coining case, about which we were led to expect so much, has collapsed. having been summarily disposed of this afternoon by the Hon. C. B. Plunket, Acting Police Magistrate. That the charge was framed upon incorrect information is clear, but the mistake, while it is probably quite natural, tells rather in favour of the Police than otherwise, Although the coiners were apparently satisfied they were engaged in a perfectly legitimate industry, and naturally resent ed the armed attempt made by the begun at 9.45 this morning. The work of filling in the foreshore from ernment receiving a royalty of 10 per Gibba Wharf to Telegraph Lane has been extent of the mistake was revealed. These conditions were such that most exactly suited the oratorical spirit of the counsel for the defence, and the running fire which was maintained upon the prosecution, the police, and the sensational newspaper accounts was of the usual lively and refreshing description. Under manner in which the new megistrate Military Service.-Rev. J. Henderson, has conducted and dealt with case, as it angure well for 11 A.M., Afternoon, 6 P.M.—Divine Services in the present instance, as more than day morning, at the hour named. to this it is satisfactory that magistrate has dealt summarily with

from the little bill paid yearly by the Colony on account of Military Contribution. This, however, proves to be an erroneous assumption, as on inquiry we find that the large Military Mulct is paid without any deduction whatever, low rates of exchange notwithstanding. Now, while we are strong advocates for imparting as much religious instruction to our military friends as the sultriness of summer will permit, it is an interesting subject of inquiry whether the War Office is not as able to pay for it as are the Colonists of Hongkong. Why the Naval Authorities should pay \$102.13 for pews during the year, while the Military Magnates should get the Colony to pay for them, is a question which probably few are in a position to gatisfactorily answer. It may be said that a £100 is a small matter, and so it might be regarded were it not for the fact that the War Office is itself : great stickler for rights and precedents. while the Military Contribution is surely a sufficiently gigantic annual subscription for the defence of the Island. These notes would at any time he interesting and useful, but at the present time they are specially appropriate, when Mr Roberts' son Herbert, the champlon finger-and-thumb player, has, with Mr Fred. Shorter, just completed a short season here. The paragraph we have headed "White-chapel" is from a paper headed, "A Practical Lesson" by the elder Roberts, and may do something to set at rest a point about which there has been controversy everywhere. Both Means Roberts and Shorter several times pocketed the other player's ball in their recent games here, but only of course when there was nothing else on the table. We may add that both these players, as do also the elder and younger John Roberts, seem to play with equal case and accuracy with either hand—an undoubted advantage when the ball gets under the cush. One pretty trick which Mr H. Roberts does has not been noticed here, if anywhere. He makes something like a thousand cannons in five minutes. This seems rather a stretch at first sight, but its seeming iming of an ansurism of the thoracic aorts, that even the punkahs in Church at the possibility disappears when we explain how Military Service are pulled by borrowed it is done. Spinning three balls on a plate they continue their revolutions for some five minutes, tick-ticking three or four times as fast as the second-hand of a clock. The notes we reproduce on page six are taken from a handsome volume. "Billiards and Other Games of the Table," recently compiled by Mr Henry Upton Alloock of Messrs Allcock and Co., the celebrated Billiard-Table Manufacturers of Melbourne, revised by John Roberts, junr, and inscribed to Sir George Bowen, the then governor. After perusing it we can truthfully say that a most interesting volume has been made out of the game in which, as Thackeray said, "three ivory balls are pushed about by two men with sticks."

"THE state of the weather has rendered it necessary to postpone the Garden Party fixed for this evening;" so reads a notice issued this afternoon. This afternoon the Dahl was to sail from Yokohama for Takao weather has been dry and pleasant, and certainly there is no decided threatening of weather to-night of such a nature as would render the garden party impracticable Even were it so, surely some arrangement could have been made to hold the entertainment to the General in the City Hall instead. But the Committee prefer, we believe, to invite General Grant to a Garden Party "on the first fine evening," an invitation surpassing in its ridiculousness, and as probably free from any tinge of compliment as the empty "you must come and dine with us one of these nights" proverbially The result will be of course that no public entertainment will be given to the General at all—a fact we shall always look back upon with regret. The Committee do not seem to have any knowledge of what is THE Japan Gazette is indebted to the Agent | required of a representative body such as been the slightest communication with the Press as to what was intended or agreed, and when the day of the proposed festival had approached, the invariable tickets for the Press had not been issued. These marked discourtesies so seldom happen that we cannot but point them out, and smartly believe that had the entertainment really come off in the Government Gardens a pleasant evening might have been the result. The entrance was to be gaily decorated and illuminated with gas, while a thousand lamps were to have represented fairyland; above and below the fountain, which would also have been lit up and had a fine effect, two large tents were to have been erected for the visitors; while behind the second terrace a large triumphal arch, with brilliant devices in gas, and the dismissed upon the ground that the A BATHER melancholy case came before the words," Welcome General Grant," would Magistrate to-day. THE P. M. S. S. Ataska arrived here all safe today, but the news she brings is nonold, as, owing to her unfortunate accident, two mail steamers bringing later dates have arrived before her. The cause of the delay has already been reported by wire as not serious, but Her safety is owing in a great measure to the skill displayed in handling her at the moment of her great peril. The vessel left San Francisco on the 6th March, and, outside, met with a strong N.W. gale, which continued to blow with varying force until the 26th. On that day the band which secures the tiller to the rudder-head got loose ed with the conlonial Treasury for the purpose assigned. The rudder was with difficulty secured temporarily, and the vessel ran for Honolulu, where she arrived on the 1st April. After making the necessary repairs, she left Honolulu on the 12th April, and the rest of the voyage was uneventful.

WITH regard to the Alaska which arrived to-day, we take the following from a San Francisco paper of the day before she left that port, that is, the 5th March, with regard to her having been remodelled. The Bulletin says:—"The Pacific Mail steamship Alaska, which sails to-morrow for China and Japan, has just undergone important alterations. All of the deck-houses and other obstructions, have been removed from about the paddle-boxes, and a large portion of the forward deck has been There are now accommodations for about sixty passengers. of Americans, especially when, as here, they found thom in friendship with each other; that he had visited many peoples and received many hospitalities, but always felt that the attentions he received were not for himself personally, but in honor of the Great Nation from which he and all who heard him came: and in his travels nothing pleased him more than to meet his own Countrymen. That in communities of Americans like that in Paris for instance, the attractions to continued residence were largely in their own circle as a distinct colony, and that this home-like association reconciled many to absence from home: But that for mere travellers like himself, seeking pleasure, they should go home as soon as they could and that was what he was now doing. That the pleasure they had in meeting the American community here was all the greater because of the distance from home.

CHINESE NOTES.

We have rather a wild theory wherewith to account for the round-towers of Ireland, one of which in particular, Clones, is exactly the same as the Mahomedan Pagoda at Canton, barring the Phallus at the top. In Galway there are many traces of the old Spanish merchants, and in Spain there are In one of the early numbers of the Chinese Repository is reviewed the book of Bernard Renaudot, who translated the books of travels written by two Mahomedan merchants in A.D. 850 and 877 respectively. Chan Achan, and ten others, were charged, on remand, by Inspector Cameron, with assaulting a seaman named Ng Fuk In, and with discharging firearms in the Harbour. It appears that Inspector Cameron observed a great disturbance the Harbour at Yoh-mah-tl on board two unks. On going on board he found junks bow-to-bow, and several mer, armed with sticks, stones and pieces of jars, board one junk. They boarded the other junk, and attacked two men, who were aft, and knocked them down. The men who were knocked down, then and attacked their assailants. Both junks then kept up a constant fire of stones and other missiles, and shots were fired from the attacking junk, two men being wounded so badly that they had to be sent to the Hospital. The affair, it appears, arose owing to the junks colliding. The case was further remanded as the wounded men are still in Hospital.

A careful consideration of the words used in the various sections of the Ordinance has led me to this conclusion. In every Section but one relating to the making and counterfeiting of coin the expression falsely is used except in Section 18 relating to the making of foreign gold and for this Section being worded in this respect different from all the others, and I can see and silver coin, but in fact the Crown contracts with the Mint who sub-contract with private firms for the supply of gold and lilver coin, according to standard of weight and purity fixed by the Crown. The Crown has also by statute taken on itself the sole privilege of making the current copper coin of the realm, but it entrusts the coinage to private firms, and in treating of offences against coin of the realm the Ordinance in as I submit to draw a distinction between hose who have authority to make good coin. but who make counterfelt coin, and those who without authority to make coin, counterfeit it. In dealing with offences against the curcent coin of foreign States the Ordinance seems

gold and silver coin to the exclusion of all and silver. If my view be right, and I see no other way of explaining the leaving out of the word "falsely" in Sect. 18 in reference to foreign gold and ailver coin, and inserting it in Sect. 22-it follows that unless the foreign Prince has taken to himcoin other than gold and silver—it is no ofience against the foreign State for a private individual to make such coin, provided it is in every respect of the proper standard, and intended to be circulated under the authority of such foreign Prince. And the question now arises has the Emperer of Anam taken upon him the exclusive privilege of coining

As to the quality of the cash in Court the same witness says it is of equal quality in every respect to the cash made in Macao and Swatow, and that he would purchase any quantity of it if offered to him for sale. On these grounds I hold that the prosecution has failed to make out a prima facie

CELEBRITIES AT HOME. MR JOHN B. GOUGH AT HILLSIDE. Though born an Englishman, John B. Gough, in his life, modes of thought, habita of utterance, diet, gait, is an American of the Americans; and his home is a type of the American gentleman farmer's residence. It is in the State of Massachusetts, six miles by the town of Worcester—a lesser Boston, situated forty-four miles from the American Athens, on a main line of railway. You take the ten-o'clock express at Boston, and at 11.20 step from the train at Worcester, Thence it is an agreeable walk or drive to Hillside a characteristically American house—picturesque ing on the subject of temperance accuboth as to its shape and situation, with Wide pillared verandah running all round it; broad windows opening to the floor, sheltered by Venetian blinds; a great sunare wooden cupola on the top, with a shading cornice; a wider cornice ornamenting the caves of the house itself, well-worn theme. home is naturally somewhat surprised to find it such a beautiful property. But lecturing in the United States is a different pursuit from lecturing in England. In this country Mr Gough is a temperance lecturer only; and it is true he is that preëminently in the States but there he is also one, if not the chief, of the lyceum speakers, who spread all over the country every winter, addressing such hosts of people as English lectureaudiences can scarcely conceive. John B. Gough's usual fee is two hundred dollars, or about forty pounds. In some of the larger cities he receives eighty guineas per night, the profits of the association which manages the lecture being often quite equal to the lecturer's hopforarium. Multiply these figures per might by one hundred and fifty nightshis yearly average of lectures-and it will be seen that Mr Gough's income is equal to such a home as Hillside. As a matter of fact it is equal to much more; and a less open-handed giver than Gough would be at his age wealthy. Gough has this home, and that literally is all. He has accumulated no comarduous work. His charities have been boundless, though always unostentatious. ment from his active life is a thing that years he has been, except during the summer months, incessantly travelling. It is imposs ble to converse long with Mr Gough without his passing to the subject of temperance. For thirty-five years this theme has formed the staple of his discourses. There is not an actor on any stage who can approach him in versatility. In illustrating his lectures he will play with equal ease the rollicking Irishman, the unbending Scotch descon. the frivolous coxcomb, the shoulder heaving Frenchman, the brutal husband, the broken hearted wife, the plantation negro, the toper in every stage. Mrs Gough, without whose strong and helpful presence no sketch of Mr Gough at home would be complete, is an enthusiasticadmirer of her husband's oratory, even after a life-time of familiar association with it, and warms with interest on the smooth and pleasant carriage road from subject whenever questioned concerning the secret of his powers. 'He has no method,' she says; 'it is like the striking of a match.' Mr Gough himself says there are two distinct currents of thought streaming unceasingly through his mind as he speaks-appropriation and rejection. With all the mass of matter bearmulated during five-and-thirty years present in his memory, it is the embarrassment of the choice which to use and a great embarrassment it is. Besides this, there is also ever present a desire to bring forth something new on the lightly on the earth, seeming to have no illustrations which always, result harcoller, and to be supported on an airy moniously, thanks to an innate sense of structure of diamond-latticed trelliswork, fitness which never yet let him be betrayed into a Sir-Boyle-Roche-ism. This is never done in America, even by the Irish and Germans, who mostly consume, the first the whisky, the latter the lagerbier, which is drunk there. An effort has been made by some statisticians to show that the introduction of that light and cheap beverage, lagerbier, has had its share in expilling the more poisonous kinds of drink from the United States; but this Mr Gough does not believe. He asserts that a class of diseases, never known in America, has been introduced there among men who are lagerbier drinkers. A man can drink ten times as much lagerbier as he can water; the liquid is quickly diffused, and, thus various organs are put to an undue and unnatural strain, which speedily culminates in weakness and disease. Of course he was laughed down, but the circumstance was duly recorded in the reports and telegraphed all over the country. The next ds he made a masterly speech on the Chinese question. He said that the Mongolians were a debased race; they didn't keep pace with the march of civilization; one great cause of dissatisfaction was the yellow color of the linen washed by them. Now, if they were only compelled by the new Constitution to use Boody's Improved Scap, all would be well. He was indignantly rapped to order by the Chairman, but he got a double headline in all the papers the next morning. The next day one of the war-horses of the Convention was urging that body not to be affected by popular clamor—he would submit to no dictation, he said, from the "great unwashed." The next minute Boody was on his feet to insist that no person, however poor, need go unwashed, now that Boody's Infallible, etc., ctc. THE Prescott Miner mentions that a citia zen of that place "is recovering rapidly from the injuries sustained, about six weeks since, by stepping through a tran-door and falling a distance of ten feet." He's in luck. It is seldom that a man recovers from a ten-foot drop through a trap. An Irish Wicklow Quaker was recently replied to by a lady listener. The Quaker was exclaiming against agitation. The lady responded, "What good in the world was

PATTERNS.

They must not be of intrinsic value. rule excludes all articles of a saleable nature. and indeed whatever may have a value of its own, apart from its mere use as a pattern: and the quantity of any material sent ostensibly as a pattern must not be so great that it can fairly be considered as having on this ground an intrinsic value.

Pattern and Sample Post to colonies and foreign countries is restricted to bond fide trade patterns or samples of merchandiss. Goods sent for sale, or in execution of an order (however small the quantity may be) or anyarticles sent by one private individual to another, which are not actual patterns or samples, are not admissible.

Patterns or samples, when practicable must be sent in covers open at the ende and in such a manner as to be easy of examination. Samples of seeds, drugs, and such like articles, which cannot be sent in covers of this kind, -but such articles only. -may be posted enclosed in boxes, or bags of lines or other material, fastened in such a manner that they may be readily opened: or, in the case of seeds do., in bags entirely closed, provided such closed bags are transparent, so as to enable the Officers of the Post Office readily to satisfy themselves as

to the nature of the contents. There must be no writing or printing upon or in any packet except the address of the penon for whom it is intended, the address of the sender, a trade mark or number, and the price of the articles.

The full which forbids the transmission through the Post of any article likely to injure the contents of the Mail Bags or Boxes, or the person of any Officer of the Post Office is, of course, applicable to the Pattern Post ; and a packet containing any thing of the kind will be stopped, and not sent to its destination. > To provide the greatest possible facilities for posting Correspondence for Europe, do., up to the latest moment before the departure of the French Packets, arrangements have been made for receiving at the Post Office late letters—except those to and through Australia-from 11.10 A.M. to 11.30 A.M. Each letter must bear a late fee of 18 cents extra postago.

> A similar supplementary Mail is made up for Shanghai by the English and French Contract Steamers, the late letters being receivedfrom 10 minutes after, up to half an hour after the time of closing. The late fee is also 18 cents.

Miscellaneous Notices.

Local Delivery. 1. All correspondence posted before p.m. on any week day for addresses in Victoria will be delivered the same day, and generally within two hours, unless the delivery should be retarded by the Contract

2. Invitations, &c., can generally be delivered within Victoria at the private houses of the addressees rather than at places of business, if a wish to that effect be expressed by the sender, otherwise all correspondence is invariably delivered at the nearest place of business. (See Postal

Guide, par. 103.) 8. Boxholders who desire to send Circu-The Union may be taken to comprise (including printed or lithographed letters), co., all of the same weight, to addresses in photographs (when not on glass or in cases Hongkong, Bangkok, or the Ports of China drawings, prints, or maps, and any quantity Office unstamped, the postage being then charged to the sender's account. Printed Circulars may be inserted in such Pattern Packets.

Local Parcel Post.

1. Small Parcels may be sent by Post between any of the British Post Offices in China or Japan, as well as to Macao, Pakhoi, Singapore, Penang, and Malacca. They must not exceed the following dimensions, 2 feet long, 1 foot broad, 1 foot deep, nor weigh more than 5lbs. The postage will be 20 cents per lb., which will include Registration. The parcels may be wholly closed if they bear this special endorsement, PARCEL, CONTAINING NO LETTER, but But a book-packet may not contain any any parcel may be opened by direction of

> &c.) Glass, Liquids, Explosive substances. Fish, Game, Fruit, Vegetables, or whatever is dangerous to the Mails, or likely to become offensive or injurious in transit.

> 3. Parcels will as a general rule be forwarded by Private Ship, not by Contract Mail Packet. The Post Office reserves the right of selecting the opportunity for transmission, and of delaying delivery in case the number of parcels is such as to retard other correspondence. No responsibility is accepted with regard to any parcel, but the system of Registration will secure the senders against any but a very remote probability of loss.

4. The public are cautioned not to confound these facilities with a Parcel Post to Europe, &c., which does not exist.

Mails exchanged with Manila and Saigon.

The Philippine Islands being now admitted into the General Postal Union, it follows that all paid correspondence received from Manila in the mails will be delivered free by this Office, and that all paid correspondence sent to Manila in the mails should be delivered free there.

Article IX of the Postal Treaty of Berne provides that " Neither the senders nor the addressees of letters and other postal packets shall be called upon to pay, either In the Country of Origin, or in that of Destination, any tax or duty other than the recognised rates levied (in the case of paid correspondence) by the despatching Office. It is hoped that any extra charge, or apparently extra charge, will at once be brought to the notice of the proper authorities, in either Colony.

The above does not apply in any to loose letters sent outside the mails, These will always be charged on arrival in Hongkong and probably the Manila Office will adopt

the same course. Complaints are sometimes received of extra charges on correspondence exchanged between this Colony and Saigon, but it is believed it would be found in all cases that the letters, drois had been sent loose.

Any Foreign stamps on loose correspondence are obliterated in this Office.

Indian Correspondence.

Unnaid Letters are not received for the Indian Mail Packets.

The Pre-payment of correspondence for the Straits, India, Ceylon, and Aden is compulsory by whatever opportunity it forwarded.

Registration to Bangkok,

Her Britannic Majesty's Consul General for Siam has been good enough to make arrangements by means of which correspond dence can be Registered to Bangkok, at the usual charge of 8 cents.

Mails for the United Kingdom, &c. by French Packet.

Under instructions from the London Post Cflice, the Malls for the United Kingdom which have hitherto been forwarded via Marseilles, will henceforth be forwarded via Naples, as it is understood that a gain of twelve hours results from the adoption of this route.

As it would be extremely inconvenient to divide the mail, and no practical advantage would result from doing so, all correspondence intended for the United Kingdom by French Packet will be sent viâ Naples, even though marked via Marseilles.

An impression appears to prevail that correspondence for the Mediterranean stations, Gibraltar, Malta, Cyprus, the Levant, Turkey, &c., can be forwarded only by British Packet. It can be forwarded also by French Packet, and if so forwarded generally arrives a week earlier than if it had been detained for the British Mail.

The Post Office is not, by law, responsible for any loss or inconvenience which may arise from the non-delivery, mis-sending or mis-delivery of any letter, book, or other postal packet (even if the packet be registered), nor is the Post Office responsible for any injury which a packet may sustain

during its transmission. To guard against such injury all postal packets which are likely to suffer from stamping or from great pressure should be placed in strong covers; and even with this precaution no fragile article should be sent through the Post. It should be remembered that every packet has to be handled several times; that it is exposed to considerable pressure and friction in the mail bag; and that, whenever the bag has in the course of its transmission to be transferred by means of the railway apparatus, the risk of injury is much increased.

No information can be given respecting letters which pass through a Post Office except to the persons to whom they are addressed; and in no other way is official information of a private character allowed to be made public. A Postmaster may, however, give an address if he has no reason to believe that the person whose address it is would disapprove of his doing so.

" Postmasters are not allowed to return any letter or other packet to the writer or sender, or to any one else, or to delay forwarding it to its destination according to the address, even though a request to such effect be written thereon.

Postmasters are not bound to give change nor are they authorised to demand change and when money is paid at a Post Office, whether as change or otherwise, no question as to its right amount, goodness, or weight can be entertained after it has been removed from the counter.

Postmasters are not bound to weigh any letters or other packets for the public, but they may do so if their duty be not thereby impeded.

The practice of sealing letters passing to and from the East and West Indies, and other countries with hot climates, with wax (except such; as is specially prepared), is attended with much inconvenience, and frequently with serious injury, not only to the letters so sealed but to the other letters in the mail, from the melting of the wax and adhesion of the letters to each other. The public are therefore recommended, in all auch cases, to use either wafers or gum, and to advise their correspondents in the countries referred to, to do the same.

less large sums of money or other articles. Offices close some hours before the deparof great value should not be tent through the post, even if the packet be registered; as ... the machinery of the Department is not clude any fraction of a penny. Orders will arranged with a view to such transmission. By law, the Post Office is not responsible for the safe delivery of registered packets; though any officer who may neglect his duty on this point will be called to strict account. Sent in unregistered letters, valuable articles are exposed to risk, and offera temptation which ought not to be created; and the Department cannot in any way undertake the sale conveyance of such packets. All in and or colonial letters, therefore, which contain coin, and all inland letters which contain watches or jewellery, even though they be posted without registration, are treated as registered, and charged on delivery with a double registration fee of eightpence in addition to the ordinary postage; and any such letters which cannot be registered in time to be forwarded by the Mail for which they are posted are detained for the next despatch. Even if the letter do not contain any article of intrinsic value, it should, if it be very important, be registered.

Most countries to which Hongkong forwards Correspondence having joined the General Postal Union or being probably about to do so, it is necessary that the following rules be strictly observed.

1. No Letter or Packet, whether to be registered or unregistered, can be received for Postage if it contains gold or all vermoney, jewels, precious articles, or amything that, as a general rule, is liable to Customs

2. This Regulation prohibits the sending of Patterns of dutiable articles, unless the quantity sent be so small as to make the sample of no value.

3. The limits of weight sllowed are as follows ---

Indemnity for the Loss of a Registered Letter The following Regulations as to the Indemnity to be paid in certain cases on the loss of Registered correspondence have

been made by His Excellency the Governor under Ordinance 10 of 1876, Section XII. The Post Office is not legally responsible for the safe delivery of Registered correspondence, but henceforth it will be prepared to make good the contents of such correspondence lost while passing through the Post, to the extent of \$10, in certain

cases, provided :--1. That the sender duly observed all the conditions of Registration require.

2. That the letter was securely enclosed in a reasonably strong envelope. 3. That application was made to the Postmaster General of Hongkong immediately the loss was discovered, the envelope being invariably forwarded with such application unless it also is lost.

4. That the Postmaster General is satisfied that the loss occurred whilst the correspondence was in the custody of the British Postal administration in China, that it was not caused by any fault on the part of the sender, by destruction by fire, or shipwreck, nor by the dishoresty or negligence of any person not in the employment of the Hongkong Post Office.

5. No compensation can be paid for mere damage to fragile articles such as portraits, watches, handsomely bound books, &c., which reach their destination, although in a broken or deteriorated condition.
